Emergency Lighting

LUXIONA Sagelux

**Luxiona is a European group specializing in the design and development of professional lighting solutions.**

**Our more than 90 years of experience, and our values based on design, service, and customization, make us a competitive, innovative, and efficient partner in the lighting industry.**

**When you place your trust in Luxiona, you do so not only in terms of our products and lighting solutions, but also in terms of our sales, development, and customer service.**

**We are here to support you in your projects and grow together.**

**Sagelux**

**Emergency  
& Safety  
Lighting**

---

**Life, with its constant evolution, presents us with new and disturbing threats. Man has tried all his life to anticipate them and prevent their consequences.**

**From this natural vocation, Sagelux offers a complete range of products focused on safety. As for emergency lighting, it is accompanied by the luminaire, the motor, and the origin of the group to which it belongs, Luxiona.**

# Values

## Quality management system

---

Since 1997, Luxiona Iberia S.A. (brand name SAGELUX), knowing the importance of customer satisfaction, has had a Quality Management System according to UNE-EN ISO 9001 in all its different editions (1994, 2000, 2008, 2015). Thanks to the efforts of all employees, the Quality Management System of Luxiona Iberia S.A. has been certified according to UNE-EN ISO 9001:2015.

AS established in Article 7 of Law 10/1998, Luxiona Iberia S.A. participates in the ECOTIC Integrated Management System.

## Flexibility and service

---

Service and flexibility are part of Luxiona's basic structure. We are committed to our customers and strive to improve every day, shortening delivery times, and increasing the reliability of our products. In addition, we closely monitor the demands of the market and adapt accordingly.

## Sustainability

---

For us, having a competitive and technically appropriate product is just as important as ensuring that our business does not harm the environment. As a company, we have always been committed to minimizing the contamination of materials and contributing to the recycling of products at the end of their life. We also work with nearby suppliers to reduce transportation and, therefore, pollutant emissions.

## Technology

---

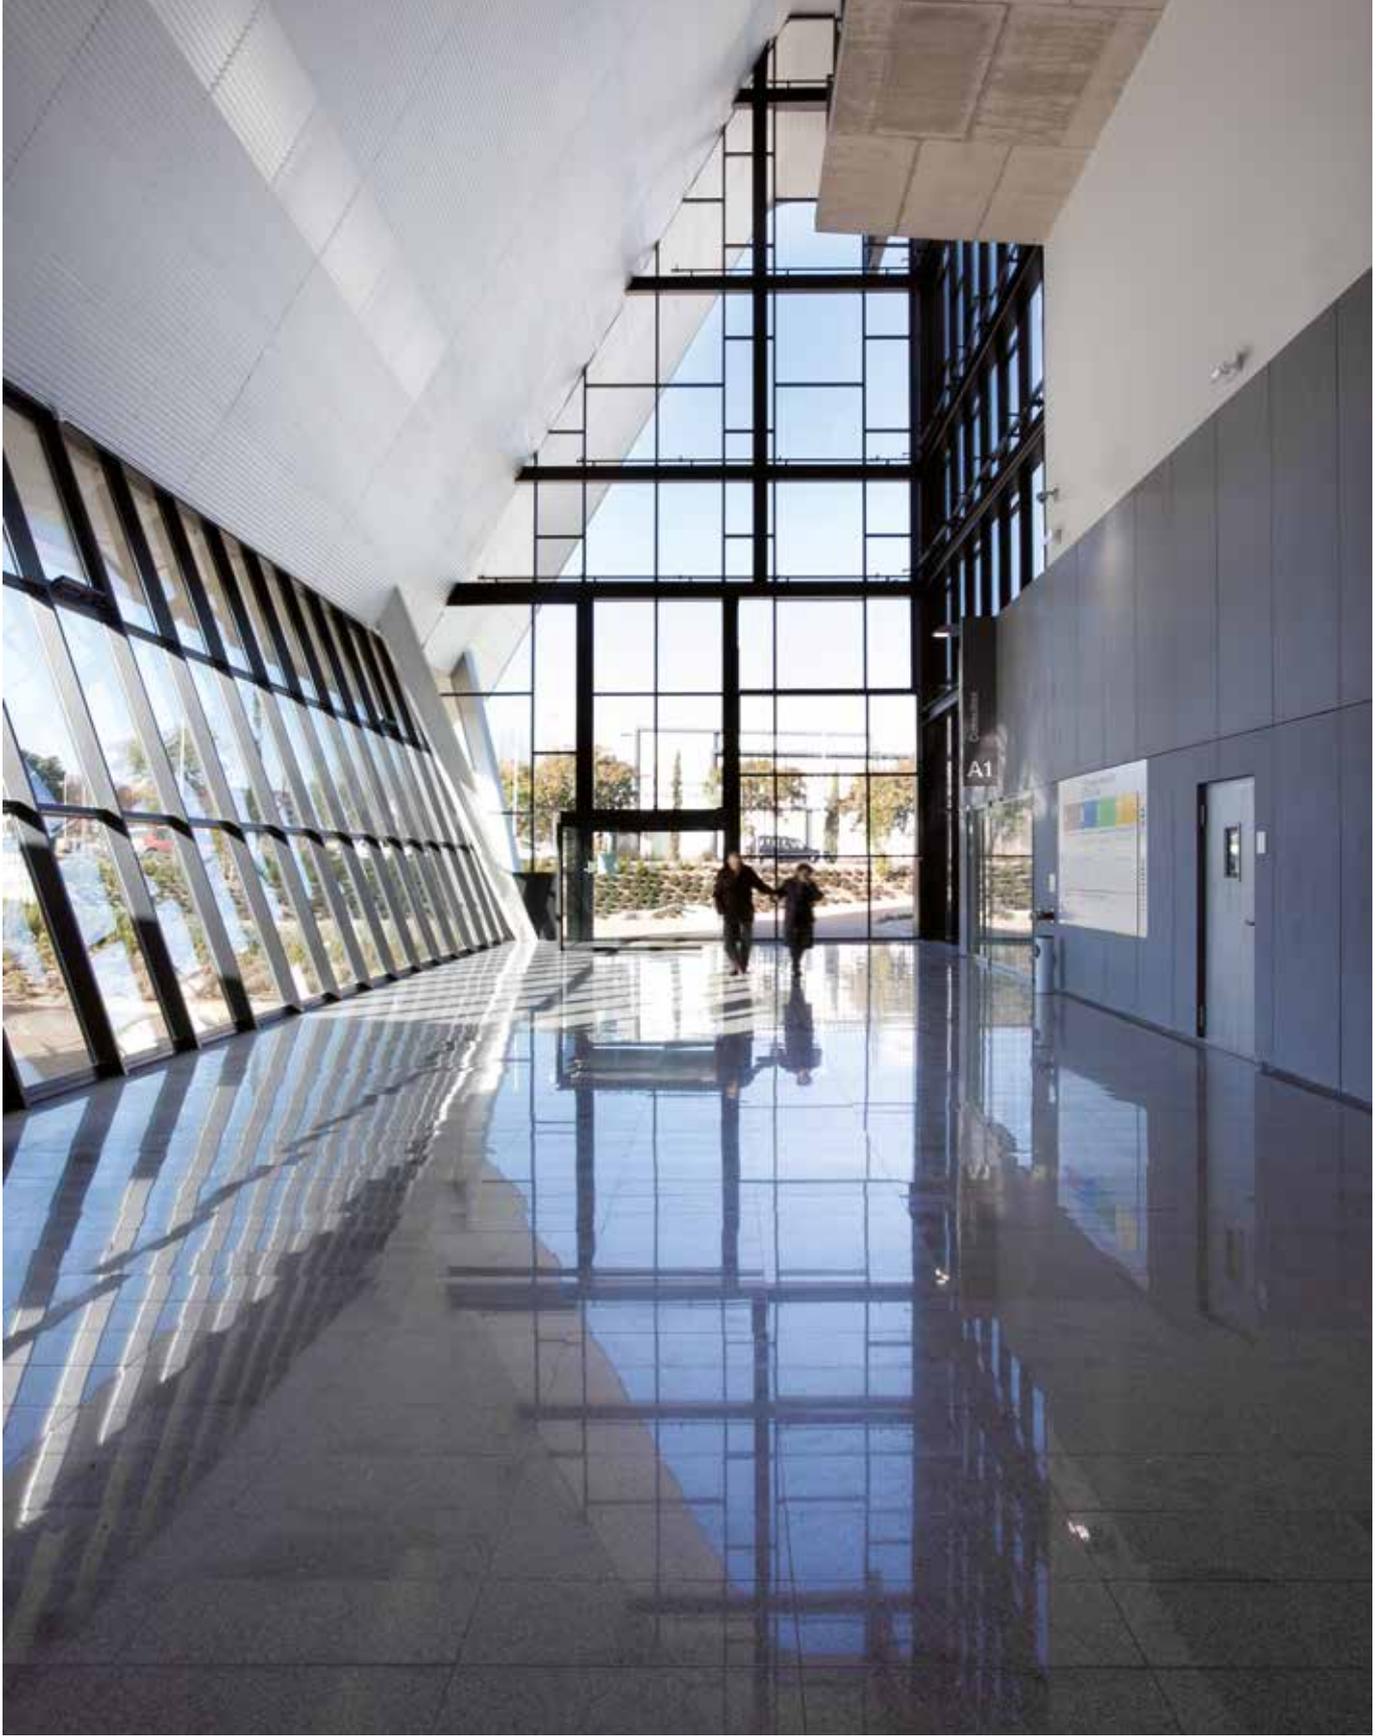

It is obvious that we live in an increasingly technological and developed world. Innovation is a challenge that we cannot ignore as it permeates every aspect of our lives. In terms of safety, this challenge becomes even more transcendent; it becomes our *raison d'être*. At Sagelux, we strive to develop systems that ensure safety first and foremost, while exploring how technological innovation can help us achieve this goal.

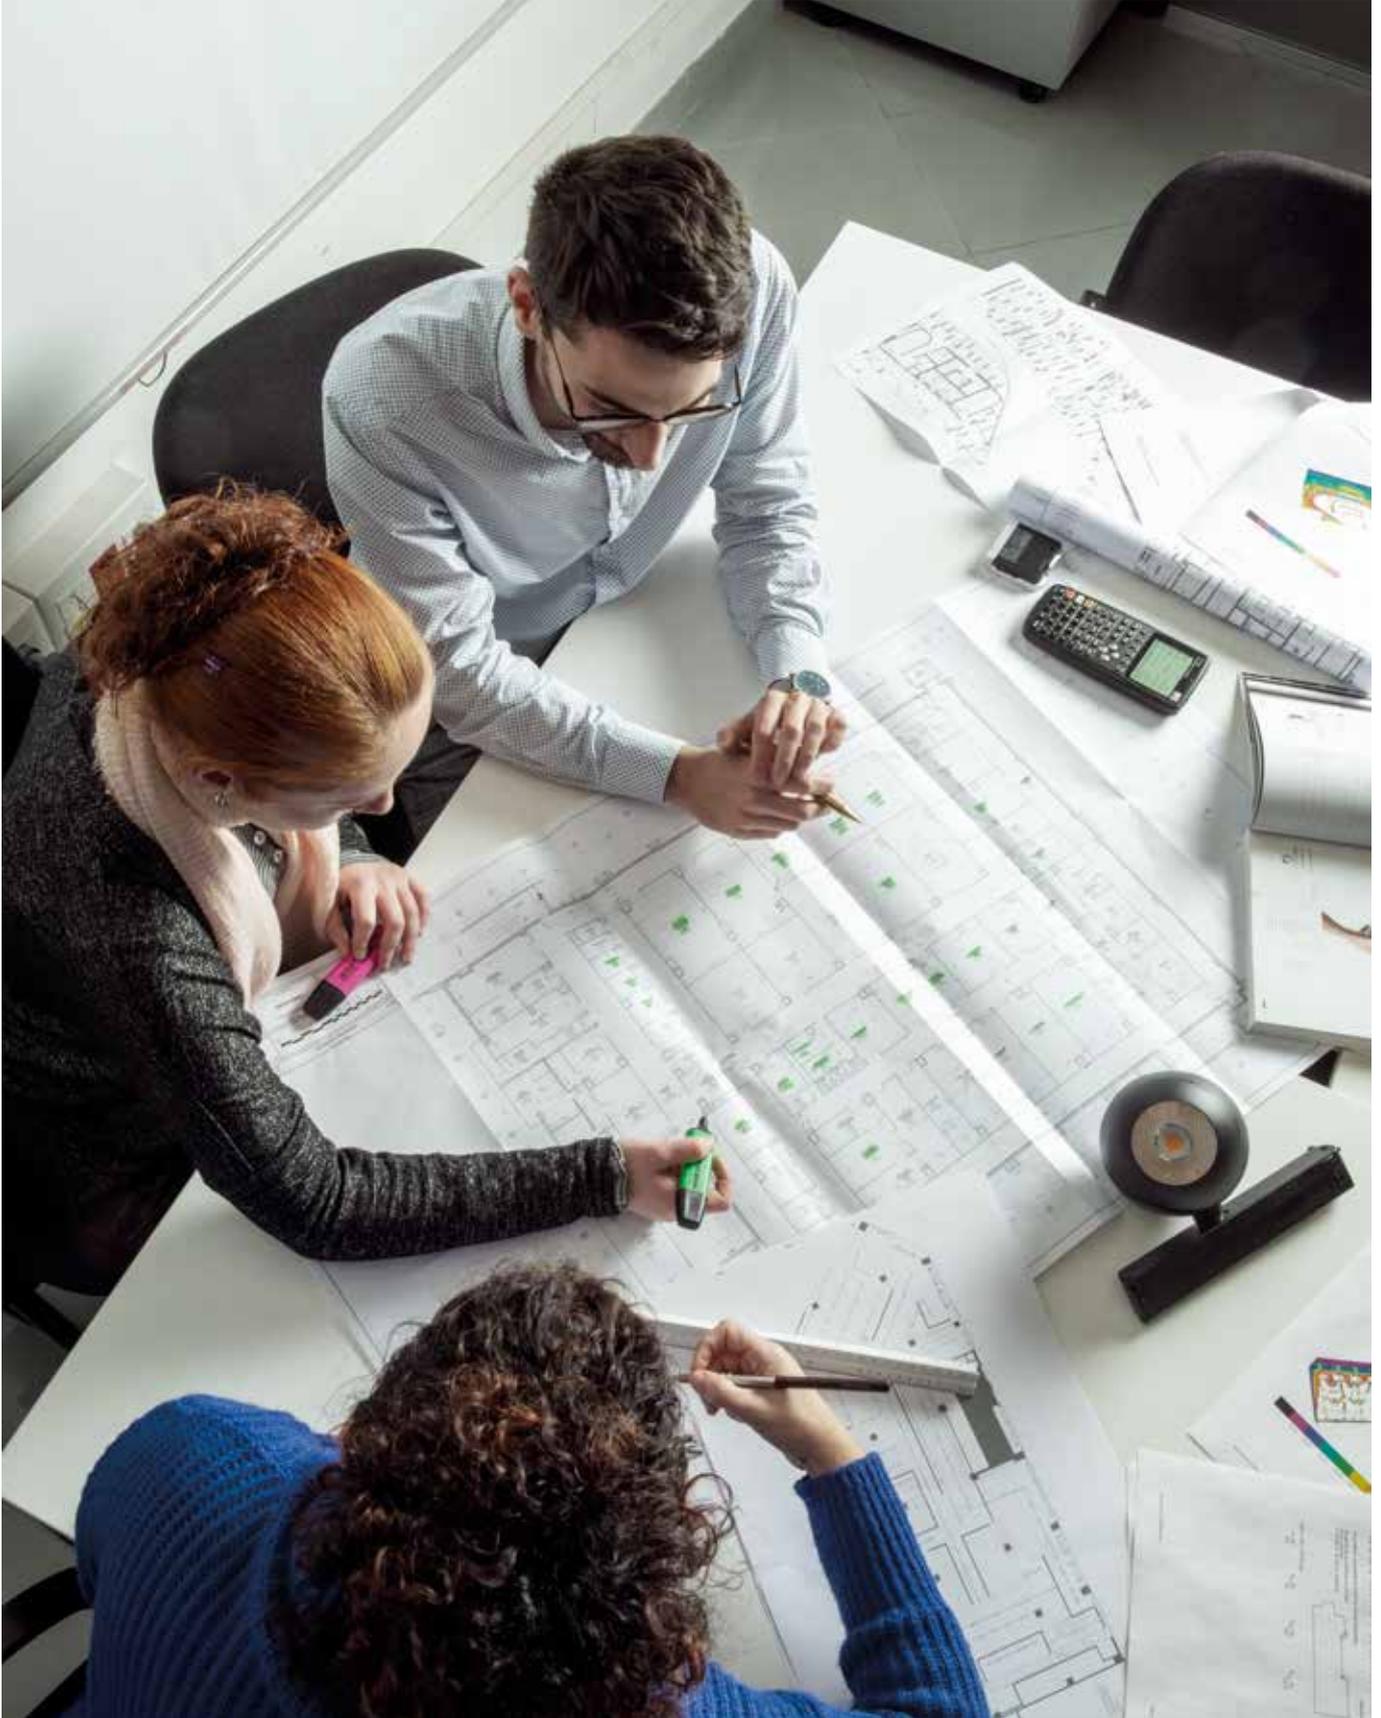

## Design

---

Safety has never competed with the design and integration of elements in the space. Our luminaires adapt and cooperate with the creativity of the interior designer. They offer a wide range of possibilities to perfectly combine both concepts. Safety and harmony are a perfect combination, where Sagelux finds the perfect balance for its products.

Our services are an added value to our products because we are very interested in the result, and therefore we like to work actively with professionals throughout the lighting project.

From our project department, we support the professional, advising him in the choice of the most suitable lighting project and offering solutions adapted to each space.

Thanks to this service, the customer receives a complete study for the emergency lighting of the space he wants. Our professionals perform all the necessary calculations to comply with all applicable regulations and maximize lighting and safety.

It is a personalized consulting service that develops solutions adapted to specific needs and participates in the entire cycle of each emergency lighting project.

On our website you will also find all the necessary tools to calculate the emergency lighting, allowing you to simulate the final result.

## Features

Elegant design with pure and essential lines.  
 The small size and geometric features provide the necessary security with the least visual impact. Suitable for wall mounting in horizontal or vertical position using the hardware provided.  
 Intelligent self-monitoring system for proper battery maintenance, prevention, and detection of failures.  
 The Brick version combines security with a minimalist design.

Reference	Description
13.5504.0002.00	Maintained power supply (24V), 1 hour burn time for up to 50 beacons. Remotely controllable.
13.5504.0003.00	Maintained power supply (24V), 1 hour burn time for up to 80 beacons. Remotely controllable.

• Autonomous and centralized versions conform to ITC-BT-28) of the Low Voltage Directive.

• Supply voltage:

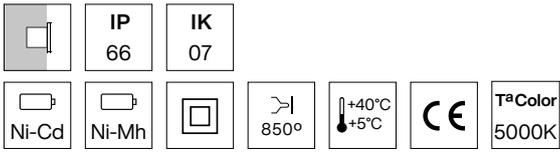

Autonomous beacon: 230V 50Hz (110V 50/60Hz optional).

Signaling beacon: 230V 50Hz (110V 50/60Hz optional).

• K2 can be recessed into walls and floors and can be installed with or without a flush-mounted box. All luminaires are supplied with a flush-mounted box. They cannot be installed in a universal box.

# Special emergency luminaires

# 92 Nix

# Nix

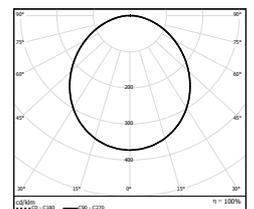

## Features

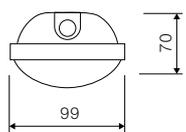

Nix is a range of LED waterproof luminaires with numerous installation options that can be mounted on walls and ceilings or as suspension fixtures. These luminaires are particularly suitable for use in spaces where a high level of protection against environmental factors is required: high humidity, pollution, and risk of impact.

\*For direct supply of driver with 230Vdc up to 5W

### Appropriate kit selection

Based on nominal voltage of light source

Select the nominal voltage (Vout) of the light source

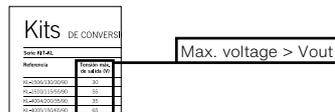

Based on actual power/current of the light

Check with the manufacturer or the data sheet for the power (P) in watts (W) and the output current (Iout) of the driver in amperes (A)

Calculate the voltage of the light source (Vout)

$$V_{out} = \frac{P}{I_{out}} \text{ ___ V}$$

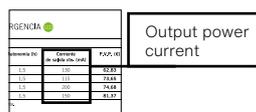

Choose a kit with a maximum output voltage higher than that of the light

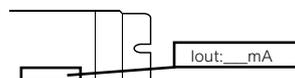

### Luminaire performance

$$\text{Performance} = \frac{\text{Kit output current}}{\text{Luminaire output current (Iout)}} \times 100 = \text{___ \%}$$

Choose a kit with a maximum output voltage higher than that of the light source.

If you have access to the driver of the light, select the output current there.

If you have not access to the driver, check with the manufacturer or the data sheet of the luminaire.

# Information on emergency lighting

Emergency lighting serves as a backup light source when general lighting fails, or its voltage is below 70% of its rated capacity. Its purpose is to:

- Illuminate evacuation signs.
- Provide the necessary lighting for escape routes so that people can leave the site safely through the corridors provided for this purpose.
- Ensure that alarm and fire protection equipment is easy to reach and use.
- Enable all necessary actions related to security measures to be carried out.

## Application of Low Voltage Directive (LVD) according to type of premises

Other regional or local regulations may apply.

	Entertainment and leisure activities	Meeting, work, and sanitary premises	Depending on the difficulty of evacuating a building	Other premises
Examples	Movie theaters, theaters, concert halls, stadiums, sports pavilions, bullrings, racetracks, theme parks, party venues, nightclubs, betting shops.	Temples, conference rooms, cafes, restaurants, museums, casinos, hotels, hostels, common areas in shopping malls, airports, passenger stations, public parking lots with more than 5 vehicles, nursing homes, day care centers.  Hospitals, outpatient clinics, sanatoriums.	Schools, libraries, stores, student dormitories, gyms, exhibition halls, cultural centers, sports and social clubs.  Offices open to the public.  Doctor's surgery, clinics.	All other premises not listed under other headings with a capacity of more than 100 persons (excluding staff).
Premises for public use?	Always	Always	Capacity > 50 people who are not part of the staff	Always

## Types of lighting

Evacuation lighting	Lighting that ensures recognition and use of escape routes when spaces are occupied or may be occupied.
Ambient or anti-panic lighting	Lighting to prevent panic hazards and provide adequate ambient light to identify obstacles and access to escape routes.
Lighting for high-risk areas	Lighting to ensure the safety of persons during potentially hazardous activities.
Replacement lighting	Part of emergency lighting that allows continuity the normal activities.
Waymarked routes	At entertainment venues and leisure activities. On any step or ramp with a slope greater than 8%. With sufficient intensity to illuminate footprints. In case of beacon pilot lights, they must be installed at a ratio of 1 light source per linear metre of width or fraction thereof.

## Standards

### Installation

Emergency lighting must comply with the following main regulations, depending on the type of emergency lighting:

<b>ITC BT 28</b>	Low Voltage Directive. Facilities in premises intended for public use.
<b>CTE DBSU 4</b>	Technical Building Code. Safety from risk caused by inadequate lighting.
<b>R.D. 2267/2004</b>	Fire safety regulations for industrial establishments

These regulations are derived from a number of related European regulations:

<b>UNE-EN 1838</b>	Lighting applications. Emergency lighting.
<b>UNE-EN 50172</b>	Emergency escape lighting systems.

### Devices

An emergency lighting device must meet the following main requirements, depending on the type:

<b>D.C. 2014/35/EU</b>	Low Voltage Directive
<b>D.C. 2014/30/EU</b>	Electromagnetic Compatibility (EMC) Directive.
<b>D.C. 2017/2102/EU</b>	Electrical and electronic equipment waste (RoHS Directive).

These regulations are derived from a number of related European regulations:

<b>UNE-EN 60598-2-22</b>	Luminaires for emergency lighting.
<b>UNE-EN 62031</b>	LED modules for general lighting - Safety specifications.
<b>UNE-EN 62384</b>	DC or AC supplied electronic control gear for LED modules - Performance requirements. (IEC 62348).
<b>UNE-EN 62034</b>	Automatic test systems for battery powered emergency escape lighting.

# Maintenance Management Systems

An improperly maintained emergency lighting system can seriously compromise the safety of a building. The UNE-EN 50175 standard states that emergency lighting should be inspected regularly. For this reason, at Sagelux we are particularly aware of the importance of safety and preventive maintenance of our products, and for this reason, we have developed control systems for emergency lighting systems. Depending on the type of project and with the aim of allowing the customer to control and manage the maintenance of their equipment, we present several alternatives.

## AUTO TEST System (UNE EN 62034)

The AUTO TEST system is an automatic verification system built into the lights. Through visual indicators, it informs about the condition of the main components of the lights: Lamps and batteries.

The tests are indicated to the user by two LEDs in different colours: green and yellow. These tests are performed automatically with the following regularity:

Regularity of tests	Continuous	Battery charge
	Weekly	Switching to emergency mode Illumination of the emergency light
	Quarterly	Battery life

**Always-on facilities** In order to avoid putting the equipment out of service while performing the autonomy tests, the system can perform the tests in an odd/even mode. In this mode, the devices are tested alternately (one of two lights) without the need for a double remote-control circuit.

**Remote control** The AUTO TEST system can be controlled by the BT -12 remote control, which allows the following operations to be performed from the control panel on which it is installed:

Switching to standby mode	Manual start of function/ autonomy	Phase displacement in 24-hour duration tests between adjacent luminaires
---------------------------	------------------------------------	--

The remote control circuit is wired with a 2 x 1.5 mm<sup>2</sup> cable. Each remote control can control up to 100 lights.

# General conditions of sale

(Spain, Portugal, and Andorra) See especial conditions of sale for Latin America.

## 1. General

All placed orders imply the buyer's acceptance of our general conditions of sale defined below.

## 2. Order management

### Sample order management

Samples are always charged, except for promotional samples, which are sent free of charge.

Samples must be returned freight prepaid within 30 days. No depreciation will be made as long as the sample is in the same condition in which it was shipped.

### Special orders

Luxiona Iberia S.A. reserves the right to ask for an advance payment of 20-50% for special orders if it considers that this material will not be used for a purpose other than that requested by the customer.

## 3. Delivery

Unless expressly stated in writing, delivery times are indicative only and no claims for damages or penalties due to delivery delays can be asserted. No cancellations or changes will be accepted after 48 hours from receipt of the order will not be accepted.

Failure to meet the delivery deadline does not entitle the customer to terminate the purchase contract without setting a reasonable deadline to remedy the delay.

Each shipment is to be considered a separate operation in every respect, even though some of them are part of the same order.

## 4. Prices

The prices of the goods are those indicated in our price list unless expressly agreed and confirmed by LUXIONA.

## 5. Cancellations

Firm orders cannot be canceled without the express confirmation of Luxiona Iberia S.A. However, they can be cancelled unilaterally by our company if circumstances so require.

## 6. Freight terms and charges

For shipments to the Peninsula and the Balearic Islands, the shipping costs will be borne by the Luxiona Iberia S.A. Group if the amount indicated in the invoice exceeds 400 euros (excluding taxes and fees). If the carrier is determined by the buyer, the shipping costs will be borne by the buyer.

For shipments to the Canary Islands, Ceuta, and Melilla, Luxiona Iberia S.A. will cover the shipping costs if the net amount of the shipment exceeds 1.000€. For orders to Portugal, the same costs apply as in the Peninsula if the order exceeds 400€ excluding taxes.

Exports are subject to the conditions corresponding to the Incoterm, which are agreed individually with each customer and recorded in the Customer's File. If no specific conditions have been agreed, the Incoterm Ex Works is usually used.

For shipping orders with a lower amount by prepayment will be charged 18 €. The minimum order value is 100 €. Orders under this amount will incur an additional charge of 15 €. The buyer is responsible for inspecting the goods upon delivery or within 24 hours of delivery. After this time, no complaints due to transport incidents will be accepted.

## 7. Delivery

The place of delivery and thus of sale shall be deemed to be our factory or our warehouse at the time the goods leave these places. If the goods are delivered directly to the consignee at our distribution warehouses, the identification number, the tax identification number, and the signature of the person collecting the goods shall be indicated on the dispatch note.

## 8. Quality and other faults

The small differences in our products in terms of size, colour or any other change in the finish, are not grounds for complaint by the buyer unless otherwise agreed between the two parties. Luxiona Iberia S.A., as part of the continuous improvement of its products, may change or vary them without prior notice. All products included in this catalogue are subject to the general warranty conditions of Luxiona Iberia S.A. (<https://bit.ly/3mX6G0k>) [luxiona.com](https://www.luxiona.com)

## 9. Returns

Returns will only be accepted for the material listed in the current price list, which excludes special orders of any kind and canceled or out-of-stock references.

All returns must be accompanied by the dispatch note number under which the product was shipped.

If accepted, the return must be in the original packaging, unmarked, and in good condition.

All returns must be analyzed by our technical support team, which is responsible for their verification. Payment for all accepted returns is subject to a minimum devaluation of 15% of the net invoice amount. In case of receipt of unsaleable material (for any of the above reasons), a 100% devaluation will be applied. Once this situation has been communicated, the material will be available on our SAT for 30 days. After this period, the material will be destroyed. Returns will not be accepted without written authorization from Luxiona Iberia S.A., nor will additional material not covered by the authorization. The return number must be clearly visible on the outside of the shipping packaging (never on the product itself). Returns must also be shipped freight prepaid and at the customer's risk and expense. Returns will not be accepted if the material is more than 90 days old, based on the invoice date of the shipment.

## 10. Payment

Terms of payment are to be agreed with our customers.

Payments due must be made on time. Otherwise, we are entitled to charge default interest.

Payment delays result in a temporary suspension of agreed or pending obligations until they are resolved.

The Buyer is not entitled to withhold overdue payments in whole or in part because a claim has not been recognized, as this does not release him from his payment obligation.

## 11. Place of payment

Unless otherwise agreed, invoices shall always be payable on the due date at the Seller's registered office.

## 12. Retention of title

The delivered goods remain our property until full payment. If payment is made by check or bank transfer, it shall be deemed to have been made at the time the corresponding commercial document becomes effective. The retention of title remains with us even after the resale of the goods by the buyer and until the debt has been settled.

## 13. Jurisdiction

For all disputes arising from this warranty, Buyer and Seller expressly submit to the jurisdiction of the judges and courts of Barcelona (Spain) and waive any other jurisdiction or retention of title to which they may be entitled.

## 14. Costs and expenses

Legal costs and expenses, including attorney's fees and court costs, shall be borne by the Contractor who incurred as a result of a breach of these General Conditions of Sale or the Contract in general.

## 15. Legal

This contract of sale is subject to the present contract and, alternatively, to the provisions of the Spanish Commercial Code.

## 16. Taxes and duties

The prices shown in the current price list do not include VAT. ECOTAXES are included.
